DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 6 recites the broad recitation steel workpiece, and the claim also recites workpieces of chromium-containing alloys which is the narrower statement of the range/limitation.

3. Claims 6 and 7 provides for the use of the hard metal, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 6-7 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153

USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ederyd et al. (U.S. Patent No. 6,602,312) in view of WO 96/21052.

Ederyd et al disclose a cemented carbide comprising at least one hard phase in a binder phase which comprises 8.0 wt% Fe-Ni-Co, 0.7% Cr and 0.3% Mo, wherein the Fe-Ni-Co has a composition of 40.5% Fe, 21.1% Co and Ni remainder. The Cr content in the binder therefore is 7.7%. (0.7/9)

The difference between Ederyd et al and the claims is that Ederyd et al do not teach the cemented carbide as cutting material.

However it is known in the art that cemented carbide having corrosion resistant binder phase similar to Ederyd can be used for metal cutting application, see WO96/21052, page 2, lines 3-6. Thus it would have been obvious to one of ordinary skill in the art that the cemented carbide taught by Ederyd et al can be used for such application.

As for claim 2, Mo is also included in the amount of 3.3% of the binder phase (0.3/9).

As for claim 3, the binder phase includes O, col. 3, line 8.

Regarding claim 4, Ederyd et al teach the claimed limitation in col. 2, lines 23-37.
